## CONTENTS

**FOREWORD** by Paula Wilson, President and CEO of Joint Commission Resources, and Katrina Crist, MBA, CAE, CEO of the Association for Professionals in Infection Control and Epidemiology ........... vii

**SETTING THE STAGE:** An Introduction to Infection Prevention and Control and Joint Commission Accreditation .............................................................. ix

By Barbara M. Soule, RN, MPA, CIC, FSHEA, FAPIC, and Lisa Waldowski, DNP(c), MS, APRN, CIC

- Background ............................................................................... ix
- Creating a Comprehensive Infection Prevention and Control Program .................................................................................................................. ix
- The Joint Commission Approach to Infection Prevention and Control ................................................................................................................. x
- Using the APIC/JCR Infection Prevention and Control Workbook .................................................................................................................. xii

**ABOUT THE CONTRIBUTORS** ................................................................ xii

**ACKNOWLEDGMENTS** ....................................................................... xv

**CHAPTER 1:** Designing and Managing an Effective Infection Prevention and Control Program ........ 1

By Kathleen Meehan Arias, MS, MT(ASCP), SM(AAM), CIC

- Designing an Effective Infection Surveillance, Prevention, and Control Program .............................................................. 1
- Managing the Infection Prevention and Control Program ......................................................................................................................... 2
- Joint Commission Standards Applicable to the Infection Prevention and Control Program ................................................................. 3
- The Joint Commission Deemed Status Option ................................................................................................................................. 13
- Related Standards .................................................................................................................................................................................. 13
- Responsibility and Accountability for Preventing Infections .................................................................................................................. 13
- Summary ................................................................................................................................................................. 14
- Further Resources ................................................................................................................................. 14

**CHAPTER 2:** The Role of Leadership in Infection Prevention and Control ........................... 17

By Mary Lou Manning, PhD, CRNP, CIC, FNAP, FAAN

- Leadership Influence on IPC Performance .................................................................................................................................................. 17
- Related Joint Commission Leadership Standards ................................................................................................................................. 18
- Summary ......................................................................................................................................................... 27
- Further Resources ......................................................................................................................................................... 27
### CHAPTER 3: A Risk-Based Approach to Infection Prevention: Creating an Infection Prevention and Control Plan

By Barbara M. Soule, RN, MPA, CIC, FSHEA, FAPIC

- Using a Risk-Based Approach to Infection Prevention .............................................. 29
- Exploring Standard IC.01.03.01 .............................................................................. 30
- Creating an Infection Prevention and Control Plan ................................................ 31
- Critical Steps in Performing a Risk Assessment ................................................... 32
- Reevaluating the Risk Assessment ........................................................................ 43
- Exploring Standard IC.01.05.01: The [Organization] Has an Infection Prevention and Control Plan ........................................................................ 45
- Evaluating the IPC Plan and Program .................................................................. 48
- Developing an Infection Prevention and Control Plan .............................................. 48
- Summary .............................................................................................................. 51
- Further Resources ................................................................................................. 51

### CHAPTER 4: Implementing an Effective Surveillance Program

By Kathleen Meehan Arias, MS, MT(ASCP), SM(AAM), CIC

- Background ............................................................................................................. 53
- Joint Commission Standards Related to Developing and Implementing the Surveillance Program ........................................................................ 53
- Joint Commission Standards Related to Using Surveillance Data ......................... 59
- Joint Commission Standard Related to Investigating Outbreaks of Infectious Disease ........................................................................ 60
- Summary ................................................................................................................ 61
- Further Resources .................................................................................................. 61

### CHAPTER 5: Planning for and Managing Infectious Disease Emergencies

By Ruth M. Carrico, PhD, MSN, APRN, FNP-C, FSHEA, CIC; and Terri Rebmann, PhD, RN, CIC, FAPIC

- Planning for an Influx of Infectious Patients ......................................................... 65
- Exploring the Standards ........................................................................................ 66
- Addressing the Cornerstones of Preparedness ...................................................... 68
- Ensuring That the Physical Plant Is Ready ........................................................... 73
- Summary ................................................................................................................ 74
- Further Resources .................................................................................................. 75

### CHAPTER 6: Implementing Clinical Strategies to Reduce Infection Risk

By Loretta L. Fauerbach, MS, FSHEA, FAPIC, CIC; and Elizabeth E. Tremblay, MPH, CPH, CIC

- Exploring Standard IC.02.01.01 .............................................................................. 80
- Summary ................................................................................................................ 93
- Further Resources .................................................................................................. 93

### CHAPTER 7: Maintaining a Safe Environment of Care

By Karen Martin, RN, MPH, CIC; and Kathleen Meehan Arias, MS, MT(ASCP), SM(AAM), CIC

- The Impact of the Environment on Infection Prevention and Control Efforts ............ 99
- Exploring the Infection Prevention and Control and Environment of Care Standards ........................................................................ 100
- Demolition, Renovation, and Construction ............................................................ 105
- Monitoring and Improving Conditions in the Environment .................................... 109
- Summary ................................................................................................................ 109
### CHAPTER 13: Integrating Infection Prevention and Control into Patient Safety and Performance Improvement

By Kathleen Gase, MPH, CIC, FAPIC
