EPI[®] 101

EPI[®] 102

ASC 101

ASC 102

Advanced Education for
the Infection Preventionist

Practical training and a conference experience

Expert speakers, practical applications, knowledgeable attendees, and a highly interactive learning environment make APIC Academy courses your best professional investment in hands-on training.

You'll benefit from additional learning opportunities and networking found at larger conferences, including an exhibit hall, the APIC Store, and breaks where you are encouraged to meet IPs and other healthcare professionals who share similar challenges and opportunities.

“ Thank you for offering this incredible conference for novices. It was comforting to know I was not the only one who felt new and overwhelmed. Great job! ”

- 2015 EPI 101 course attendee

APIC Delivers:

Expert-led, cutting-edge instruction

- Our board certified (CIC®) subject matter experts update course content annually.
- Course instructors represent a variety of professional backgrounds.
- Courses feature interactive polling systems, group work, Q&A sessions, and post-course webinars.

Interactive, hands-on face-to-face learning

- Practical and complex issues taught in everyday language
- Discussions with instructors and dialogues with your colleagues through classroom lectures and small group breakouts.

Skill building

Your active participation at an APIC Academy infection prevention course means you'll be prepared to:

- Shape and manage an effective program that protects patients.
- Comply with state and federal regulations.
- Problem solve with a network of infection preventionists.
- Understand regulatory requirements and how to effectively meet their criteria.
- Start your path to becoming certified in infection prevention and control (CIC®) or take your program to the next level.

Professional networking

You'll have ample opportunities to find and meet colleagues through networking lunches, breaks, and informal conversations.

Academy Courses

EPI® 101: Education for the Prevention of Infection

**The Fundamentals of Infection Surveillance,
Prevention, and Control**

Competency Level: Novice

If you have less than one year of experience or need an infection prevention basics refresher, this three-day course is designed for you. You'll be introduced to the various roles and responsibilities of the infection preventionist and gain essential clinical and program management knowledge needed to develop an effective infection prevention program.

Attendees can earn a maximum of 20 CE credit hours*

Key course content includes:

- Basic epidemiology of infectious diseases
- Precautions and exposures to healthcare-associated infections
- Introduction to microbiology
- Designing a surveillance plan
- Using and reporting data
- Regulations and reporting
- Applying NHSN surveillance definitions
- Conducting a facility risk assessment

Fall Academy: September 12-14, 2016

Course Faculty

Lynn Slonim Fine PhD, MPH, CIC, FACIP
Irena L. Kenneley, PhD, RN, CNE, CIC, FAPIC
Sue Sebazco, RN, MBA, CIC

EPI® 102 Education for the Prevention of Infection

**Advancing Practice Using Epidemiologic
Principles**

Competency Level: Novice - EPI®101 prerequisite recommended, but not required

If you have at least one year of infection prevention experience, have already taken EPI®101 and are ready to move to the next level, this three-day course is for you. Content builds on the concepts and principles introduced in EPI 101, with an emphasis on evidence-based interventions to prevent or reduce risk.

Attendees can earn a maximum of 18 CE credit hours*

Key course content includes:

- The infection preventionist as program manager
- Building coalitions and stakeholders
- Performance improvement
- Infection prevention in surgical settings
- Outbreaks: investigation, prevention and control
- Preventing device-associated infections
- Disinfection and sterilization of instruments
- The IP's role in construction and renovation
- Emergency preparedness

Fall Academy: September 15-17, 2016

Course Faculty

Libby F. Chinnes, RN, BSN, CIC
Barbara Mooney BSMB, BSMT (ASCP), CIC
Sharon Williamson, MT(ASCP), SM, CIC

Save \$200 when you register for both courses with our bundle discount!

*Continuing Nursing Education Credits (CNEs) are a recognized method of quantifying participation in an organized continuing education experience under responsible sponsorship, capable direction, and qualified instruction. One contact hour is defined as one hour of time spent in an educational experience.

ASC 101: Infection Prevention for Ambulatory Surgery Centers Meeting CMS Conditions for Coverage

Competency Level: Novice

If you are new to infection prevention in an ambulatory care center or ambulatory surgical center, this three-day course is designed for you. You'll learn how to develop an effective infection prevention program to protect patients and comply with accrediting and regulatory requirements through evidenced-based best practices that reduce risk.

20 total CE credit hours of face-to-face training*

Key course content includes:

- Regulations and other requirements affecting infection prevention and control programs
- CMS survey tool
- Introduction to infection prevention and control
- Epidemiology of infectious diseases (chain of infection)
- Using case studies
- Employee health
- Surveillance
- Cleaning, sterilization, and disinfection
- How to implement change in your organization

Fall Academy: September 12-14, 2016

2016 Course Faculty

Kim Delahanty, BSN, PHN, MBA/HCM, CIC
Gail Harris, RN, BSN, CIC
Frank Myers, MA, CIC

ASC 102: Infection Prevention for Ambulatory Surgery Centers Sustaining and Improving the Infection Surveillance, Prevention, and Control Program

Competency Level: Novice - ASC 101 prerequisite recommended but not required

This course builds on the concepts and principles introduced in ASC 101; introduces new topics, such as product review and observational surveillance; and helps learners develop critical thinking skills they can apply to improve their infection surveillance, prevention, and control program.

20 total CE credit hours of face-to-face training*

New topics include:

- Outbreaks in ASCs: recognition, control, and prevention
- Healthcare statistics and presenting data
- Managing the perioperative environment
- Integrating the facility risk assessment, goals, measurable objectives, performance objectives, and program evaluation into the program
- Writing policies, procedures, and minutes
- Construction, renovation, and remediation
- Emerging pathogens
- Preparing for a survey

Fall Academy: September 15-17, 2016

Course Faculty

Kathleen Arias, MS, MT(ASCP), SM(AAM), CIC
Steve Odachowski, RN, CIC
Marcia Patrick, RN, MSN, CIC

Save \$200 when you register for both courses with our bundle discount!

*Continuing Nursing Education Credits (CNEs) are a recognized method of quantifying participation in an organized continuing education experience under responsible sponsorship, capable direction, and qualified instruction. One contact hour is defined as one hour of time spent in an educational experience.

Advanced Education for the Infection Preventionist

This proficient and expert-level three-day course is designed to improve your competencies in key areas essential to lead an effective infection prevention program within today's complex healthcare environment. Attendees can earn between 18-20 CE credit hours.*

Fall Academy: **September 15-17, 2016**

DAY 1: Negotiation and Conflict Resolution

Faculty: Stacey Lee, J.D.

Johns Hopkins Carey Business School

Learn tactics and strategies to successfully manage conflicts and negotiate budgeting, staffing, and process implementation. This interactive program focuses on understanding why conflicts are caused, building productive relationships, and developing meaningful conversations.

DAY 2: Construction and Renovation

Faculty: Lewis Johnson, CIH

Mary Alice Lavin, RN, MJ, CIC

Richard Vogel, MS, CIC

Gain insight into all phases of construction and renovation projects to offer knowledgeable input and guidance into those projects and develop a comprehensive infection control program. At the end of this course, you will be able to:

- Identify your role in construction and renovation projects
- Describe the regulatory agencies that impact infection prevention during projects and explain how those agencies impact infection control policies
- Describe how you will communicate those policies to staff, contractors, administrators
- Explain all phases of construction and renovation projects and the role of infection control in each phase, and read blueprints

- Analyze building materials, fixtures, and finishes for appropriateness from an infection control perspective
- Apply tools, such as the ICRA, to construction projects
- Summarize the problems that dust, water, and air present during construction and renovation project and plan how he/she will monitor for dust, water, and air
- Identify problems presented by water damage (e.g., flood) and how to mitigate them
- Explain trends in construction and renovation

DAY 3: Budgeting and Finance

Faculty: Bill Ward, MBA

Johns Hopkins Bloomberg School of Public Health

Navigate through a variety of business challenges in order to make the case for investments in reducing infections. Micro-cases are used to illustrate the concepts. At the end of this course, you will be able to:

1. Describe the characteristic and behaviors of revenues and expenses
2. Use a variety of financial tools to demonstrate the business benefits of investment in infection control
3. Identify the essential elements of a sound business proposal
4. Describe the financial impact of the emerging emphasis on population health

*Continuing Nursing Education Credits (CNEs) are a recognized method of quantifying participation in an organized continuing education experience under responsible sponsorship, capable direction, and qualified instruction. One contact hour is defined as one hour of time spent in an educational experience.

APIC would like to thank our Fall Academy sponsors and exhibitors.*
