

# Infection Prevention *and You*

## Who are infection preventionists?

Infection preventionists use their detective skills to find the bad germs and make sure everyone is doing the right things to keep you safe.

Catheters or other devices will be placed in your body after your skin receives proper cleaning.

Your healthcare workers will wear gloves, gowns, and masks at the right times.

If you are in isolation, you and your visitors may need to do this too.

Healthcare workers will clean their hands before and after they care for you.

Your room and any equipment that is used on you will be clean.
